Plugin Management

Overview

top

This page is designed to allow you to install and manage a range of plugins within your Yellowfin instance. The types of plugin available through this page include;
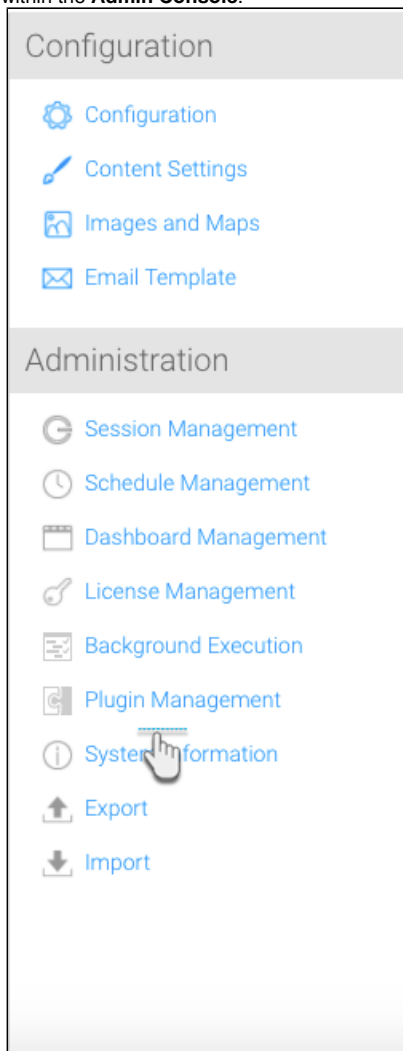

- Third Party Connectors
- JDBC Drivers
- Advanced Functions
- Converters
- Custom Formatters

Add

top

In order to add a plugin you will first need to create or obtain one - you can find a selection on the Yellowfin Marketplace. Once you have a plugin to install, follow these steps:

1. Access the **Plugin Management** page within the **Admin Console**.

Name	Description	Type
Youtube	Youtube Third Party Connector	PLUGIN
Google Analytics	Google Analytics Third Party Connector	PLUGIN
Google Sheets	Google Sheets Third Party Connector	PLUGIN
Twitter	Twitter Third Party Connector	PLUGIN

Select All / Deselect All — Add — Delete

2. From here, click on the **Add** button at the bottom of the existing plugins list.

3. On the **New Plugin** lightbox, drag and drop your plugin file. This should either be a .jar or .yfp type.

4. Provide a **Name** and **Description** for the plugin, which will help users understand what its intended purpose is. This will not be the label of the plugin outside of the **Plugin Management** page.

New Plugin ✕

Name

Description

Drag a Plugin file here (.jar/.yfp)

Cancel

5. Once Yellowfin has finished processing your file, click **Submit**.

New Plugin ✕

Byte Count Formatter

Custom Formatter

bytecountformatter.jar ✕

+ Add more

Submit

6. You will now see your newest plugin in the list.

Name	Description	Type
Youtube	Youtube Third Party Connector	PLUGIN
Byte Count Formatter	Custom Formatter	PLUGIN

bytecountformatter.jar
com.hof.mi.custom.format.ByteCountFormatter (Custom Formatter)

Edit   Delete

|		
Google Analytics	Google Analytics Third Party Connector	PLUGIN
Google Sheets	Google Sheets Third Party Connector	PLUGIN
Twitter	Twitter Third Party Connector	PLUGIN

Select All / Deselect All — Add — Delete

Edit

Editing a plugin can mean either adjusting the name and description, or updating the plugin file(s).

1. Click on the plugin in the list and select the **Edit** link.

Name	Description	Type
Youtube	Youtube Third Party Connector	PLUGIN
Byte Count Formatter	Custom Formatter	PLUGIN
bytecountformatter.jar com.hof.mi.custom.format.ByteCountFormatter (Custom Formatter)		
		Edit Delete
Google Analytics	Google Analytics Third Party Connector	PLUGIN
Google Sheets	Google Sheets Third Party Connector	PLUGIN
Twitter	Twitter Third Party Connector	PLUGIN

2. Click on the ✕ **Remove** button next to a component of the plugin in order to remove it.

bytecountformatter.jar

+ Add more   Remove

3. Click on the + Add more link in order to load new files as part of the plugin.

bytecountformatter.jar ✕

+ Add more

4. Click **Submit** to complete the edit.

Delete

In order to delete a plugin, or multiple, follow one of these options:

1. Click on the name of a single plugin and select the **Delete** link.

OR

Name	Description	Type
Youtube	Youtube Third Party Connector	PLUGIN
Byte Count Formatter	Custom Formatter	PLUGIN
bytecountformatter.jar com.hof.mi.custom.format.ByteCountFormatter (Custom Formatter)		
		Edit Delete
Google Analytics	Google Analytics Third Party Connector	PLUGIN
Google Sheets	Google Sheets Third Party Connector	PLUGIN
Twitter	Twitter Third Party Connector	PLUGIN
Select All / Deselect All		Add Delete

2. Check the box next to one or more plugins to remove and click the **Delete** button.
